

Karol Olechno

West London | karol.olechno@proton.me | linkedin.com/in/karol-o | github.com/ko-karol

A self-taught developer who also graduated from the Founders and Coders bootcamp. My journey into coding has always been driven by a strong love for learning. I enjoy the challenges it brings, and I take pride in writing neat, efficient code. But I am not just about the technical side of things - I have also worked in retail, and that has given me a solid understanding of how business works. It helps me remember that I am not just coding for the fun of it; but to create and maintain solutions that companies need. Looking forward to using all I have learned and will keep on learning to not just meet, but to exceed what is expected from a solution. I am excited to contribute my knowledge and skills to make a meaningful impact.

KEY SKILLS

- Clean Code
- Full-stack Development
- Software Craftsmanship
- Source Control
- Data Structures & Algorithms
- Database Management
- Digital Pragmatism
- DevOps
- Optimization
- Technical Literacy
- Testing
- UX Design

EDUCATION

Web Development @ Founders and Coders 2022-2023

- Honed team and project based skills by collaborating on multiple projects using the agile methodology.
 - Acquired a good understanding of design thinking, prototyping, user research and user testing.
 - Pioneered programming best practices by spearheading DevOps tasks for optimized workflow.
 - Achieved proficiency in full-stack development by working with the modern web stack.
- **Habit Monster** | Helping children transition from to secondary school: github.com/ko-karol/habit-monster.
- Played a key role in laying the foundation, shaping the structure, and mapping the direction of the project.
 - Took care of important behind-the-scenes work, making sure our project was set up correctly.
 - Cleared technical blockers to keep the project running smoothly without missing a beat.
 - Ensured our CI/CD setup matched the project's needs perfectly.

Business Diploma @ West Thames College 2016

- Fostered the ability to convey ideas as well as acquired a solid understanding of the principles of management.

WORK

WordPress Developer @ Freelance Present

- Advised clients on website design and improvements, promoting best practices for an optimized user experience.
- Created WordPress websites, focusing on design optimization and user-friendly navigation.

Retail Operations Associate @ BP 2016 – 2023

- Delivered exceptional service, leading to increased sales and improved customer loyalty by 20%.
- Managed operations, ensuring high cleanliness, safety standards and effective cooperation.
